

Grape seed powder Grapeseed powder (Grapeseed cake powder) collects all remaining useful components, which are not contained in a cold pressed oil.

Useful properties of grapeseed powder is similar to the ones of grapeseed oil. The content of grapeseed oil in the powder is not less than 5%.

Medicines and BADS (biologically active dietary supplement), produced on the basis of grapeseed powder. A number of surveys have revealed the following useful properties of grapeseed powder:

antidiabetic properties (reduces C-reactive protein in patients with 2nd type diabetes) due to contents of such bioactive substances as resveratrol, quercetine, anthocyan, flavonols, kaempferol, myricetin, reduces tumor necrosis factor alpha (TNF), which is the marker of inflammation in organism.

May be used as dietary supplement for health promotion (1 tablespoon on 1 glass of water).

For home-baked products, desserts - is added in any product in proportion up to 15% of mass of wheat flour. As an ingredient for pastry it is a partial substitute for cocoa.

In NATO forces the powder is used as natural preservative for baking bread of long-term storage. Grape seeds sludge.

Grape seeds sludge-is a product formed during the production of the oil of the 1st cold press (3% of the weight of grape oil). During the process of pressing the oil, particles of grape seeds fall into a container with grape oil, then over time they settle at the bottom of the container. The sediment left after filtering the oil is a sludge.

By its properties, grape sludge is an oil, mixed with small particles of grape seeds cake. This combination makes the sludge an ideal product for cosmetic procedures. Fine particles have all the- properties of grape seeds powder and serve as a cosmetic scrub and base for creams; at the same time, grape oil enriches skin with vitamins and microelements.

Сравнительная характеристика какао-порошка и ПВК :

Grain Characteristics Cocoa-Poros and PVC sheet
